What Is an IMDG Dangerous Goods Note Template?

The International Maritime Dangerous Goods (IMDG) Code is a set of guidelines developed by the International Maritime Organization (IMO) to regulate the safe transport of hazardous goods by sea. A dangerous goods note (DGN) is a document that accompanies shipments containing dangerous or hazardous substances, ensuring that all parties involved in the shipping process are properly informed about the nature of the cargo.

An IMDG dangerous goods note template is a standardized form or document layout

designed to capture all necessary information required under the IMDG Code. This includes details about the shipper, consignee, description of the goods, packaging, classi?cation, and emergency response measures.

Why Is the Dangerous Goods Note Important?

The DGN serves multiple purposes:

Safety: Helps carriers and emergency responders identify hazardous materials quickly and handle them appropriately.

Compliance: Ensures shipments meet international regulations, avoiding legal

penalties and transport delays.

Communication: Provides clear and accurate information to every stakeholder in the supply chain.

Liability: Acts as proof that the shipper declared hazardous goods properly, which can protect against liability issues.

Key Components of an IMDG Dangerous Goods Note Template

A well-crafted IMDG dangerous goods note template must include vital sections to meet regulatory standards and facilitate smooth logistics operations. Here?s a breakdown of the typical components:

1. Shipper and Consignee Details

This section records the contact information of the shipper?the party sending the dangerous goods?and the consignee?the recipient. Including full names, addresses, phone numbers, and email addresses is essential for traceability and communication.

2. Proper Shipping Name and UN Number

The proper shipping name is the o?cial name of the hazardous material as listed in the IMDG Code. The UN number is a unique four-digit identi?er assigned to each hazardous substance. Both are critical for identi?cation and classi?cation.

3. Hazard Class and Division

Hazard classes categorize dangerous goods based on their risks (e.g., ?ammable liquids, toxic substances). Divisions provide further detail. This classi?cation determines handling protocols and packaging requirements.

4. Packing Group

Packing groups (I, II, or III) indicate the degree of danger posed by the goods, with Group I being the most dangerous. This information guides packaging and stowage.

5. Quantity and Type of Packaging

Details about the number of packages, their type (e.g., drums, boxes), and the net quantity of goods are recorded here. Accurate data helps prevent overloading and ensures compatibility with transport methods.

6. Emergency Contact and Response Instructions

Including emergency phone numbers and instructions allows quick access to assistance in case of an accident or spill during transit.
